EDUCATION

University of Illinois Urbana-Champaign

Champaign, IL

B.S. in Computer Science and Statistics

Expected: May 2029

- **Coursework:** Computer Science I (Java), Computer Science II (C++), Data Science & ML (Python), Calculus III
- **Activities:** Disruption Lab, SIGRobotics, AI Alignment, Agentic AI, BuildIllinois, Innovation LLC

EXPERIENCE

Founding Software Engineer | Clusion

September 2025 – January 2026

- Engineered the backend document search engine in *Python (FastAPI)* for a competitive high school debate research SaaS platform hosted on *AWS*, developed by an *Agile* team of **10 engineers** and drawing **10K+ site visitors**
- Indexed **600K+ debate-evidence documents** on *Elasticsearch* via *FastAPI*, returning results in **under 1 second**
- Designed and built a text-retrieval algorithm that extracts evidence segments from debate cases by validating source URLs and filtering statistical outliers with **IQR** on the word-count distribution of tag, citation and evidence text

Product Development Intern | Jetson

January 2025 – February 2025

- Conducted **7 iterations of UI/UX testing** across 3 experimental features on the Jetson App (100K+ users)
- Delivered a **5-page report** recommending strategies to optimize user engagement directly to Jetson's CEO
- Redesigned user onboarding on *Figma*, cutting it from **12 to 5 pages**, validated via **A/B testing** on 30 test users

Data Analytics Intern | STEM E

June 2024 – July 2024

- Analyzed 3 years of TikTok data (**200+ posts**) with *Python (pandas)*, *Hootsuite*, *Power BI* and *Microsoft Excel*
- Identified that “science fun facts” posts comprised 69.3% of views, despite accounting for 7% of all content
- Pitched a “fun facts” strategy to the Executive Director, who adopted it; engagement rose **24% (8K+ views)**

PROJECTS

EcoBin | [Research Paper](#) | [Source Code](#)

March 2026 – May 2026

- Built an image processing pipeline using *U2-Net* segmentation and alpha-compositing to generate 9K images to train the model to detect contamination in recyclable waste. **Placed 2nd at the Arizona State Science Fair**
- Designed a two-stage *EfficientNetV2-S* neural network (**4.39M** parameters) in *PyTorch*, trained on **15K+ images** to classify waste into 4 disposal pathways at **96.13% accuracy**. Published a paper on *arXiv* and 2 datasets on *Kaggle*
- Engineered a smart bin prototype using *Arduino Uno* that sorts the waste item with **less than 2 second latency**

Truck Pricing VLM | [Live Website](#) | [Source Code](#)

September 2026

- Scraped **15,000** truck-listing images for *data mining*, auditing image quality via de-duplication and non-USD filtering
- Designed a *JSON schema* for a **Claude Sonnet 4.6 agent** to extract condition, brand, model and year from photos
- Built a *quantile regression* pricing model on the extracted features, reaching **87% accuracy** on **30 samples**
- Led a team of **4** to build a pricing algorithm for **Kamion (YC S22)**. **2nd of 7 at UIUC Founder's Hackathon**

Chronos | [Live Website](#) | [Source Code](#)

December 2025

- Designed a **5-step Python scheduling algorithm** that scans calendar availability, returns a ranked list of time slots and sends email confirmation for each booking. Validated algorithm across **14 unit and integration test cases**
- Built a **scheduling agent** (*React/Firebase*) that auto-books meetings for large groups (30+ ppl) on Google Calendar
- Licensed Chronos to **8 startups** & signed **2 LOIs worth \$3.5K**. **Won 2025 Congressional App Challenge**

Citation Chain | [Live Website](#) | [Source Code](#)

June 2026

- Wrote *SQL* queries over paper data stored in *PostgreSQL (Supabase)* to filter papers by field, year and citation count
- Created a dual-API ingestion pipeline resolving papers via *OpenAlex* & backfilling metadata from *Semantic Scholar*
- Built an interactive citation graph (*React Flow*) that maps a paper's outbound citations across **26 research fields**
- Deployed a **RAG agent** (*Claude Sonnet 4.5*) that retrieves session-scoped vector documents (*Supernemory*)

SKILLS

Languages & Frameworks: Python, SQL, Java, C++, JavaScript, HTML/CSS, FastAPI, Flask, Next.js, React

AI/ML: PyTorch, OpenCV, TensorFlow, Keras, scikit-learn, Grad-CAM, Hugging Face, Claude API, Gemma 4, RAG

Data & Databases: pandas, NumPy, PostgreSQL, Elasticsearch, MySQL, Firebase, Supabase, Power BI, A/B Testing

Cloud & Tools: AWS, Git, GitHub, Google Cloud, Vercel, Docker, CI/CD, Agile, API Development, VS Code, Codex

Concepts: Unit Testing, Data Validation, Data Pipelines, REST APIs, Full-Stack Development, Data Ingestion, ETL
