EDUCATION

University of Illinois Urbana-Champaign

Champaign, IL

B.S. in Computer Science and Statistics

Expected: May 2029

- **Coursework:** Computer Science I (Java), Computer Science II (C++), Data Science & ML (Python), Calculus III
- **Activities:** Disruption Lab, SIGRobotics, AI Alignment, Agentic AI, BuildIllinois, Innovation LLC

EXPERIENCE

Founding Software Engineer | Clusion

September 2025 – January 2026

- Engineered the backend document search engine in *Python (FastAPI)* for a competitive high school debate research SaaS platform hosted on *AWS*, developed by an *Agile* team of **10 engineers** and drawing **10K+ site visitors**
- Indexed **600K+ debate-evidence documents** on *Elasticsearch* via *FastAPI*, returning results in **under 1 second**
- Designed and built a text-retrieval algorithm that extracts evidence segments from debate cases by validating source URLs and filtering statistical outliers with **IQR** on the word-count distribution of tag, citation and evidence text

Product Development Intern | Jetson

January 2025 – February 2025

- Conducted **7 iterations of UI/UX testing** across 3 experimental features on the Jetson App (100K+ users)
- Delivered a **5-page report** recommending strategies to optimize user engagement directly to Jetson's CEO
- Redesigned user onboarding on *Figma*, cutting it from **12 to 5 pages**, validated via **A/B testing** on 30 test users

Data Analytics Intern | STEM E

June 2024 – July 2024

- Analyzed 3 years of TikTok data (**200+ posts**) with *Python (pandas)*, *Hootsuite*, *Power BI* and *Microsoft Excel*
- Identified that “science fun facts” posts comprised 69.3% of views, despite accounting for 7% of all content
- Pitched a “fun facts” strategy to the Executive Director, who adopted it; engagement rose **24% (8K+ views)**

PROJECTS

Chronos | [Live Website](#) | [Source Code](#)

December 2025

- Built a web-based scheduling agent (*React/Firebase*) that auto-books meetings for groups of 30+ on Google Calendar
- Designed a **5-step Python scheduling algorithm** that scans calendar availability, returns a ranked list of time slots and sends email confirmation for each booking. Validated algorithm across **14 unit and integration test cases**
- Created a lobby system that enables the host to authenticate invited participants and queue follow-up meetings
- Licensed Chronos to **8 startups** & signed **2 LOIs worth \$3.5K**. **Won 2025 Congressional App Challenge**

Citation Chain | [Live Website](#) | [Source Code](#)

June 2026

- Built a web-based citation graph (*React Flow*) that maps a paper's outbound citations across **26 research fields**
- Integrated a *PostgreSQL* database (*Supabase*) and wrote *SQL* queries to filter papers by field, year and citation count
- Created a dual-API ingestion pipeline resolving papers via *OpenAlex* & backfilling metadata from *Semantic Scholar*
- Deployed a **RAG agent** (*Claude Sonnet 4.5*) that retrieves session-scoped vector documents (*Supernemory*)

SchoolPulse AI | [Live Website](#) | [Source Code](#)

June 2026

- Built a *Python FastAPI* backend that ingests live water, waste & energy data from all 3 tools, runs **4 Random Forest models** to detect anomalies & deliver actionable steps via **Gemma Voice LLM** on a *Next.js* dashboard
- Engineered a **suite of 3 edge AI tools** that collects data regarding a school's energy, water and food consumption
- Led a team of 5 across project ideation, development and presentation. **Finalist at USAII Global Hackathon**

Truck Pricing VLM | [Live Website](#) | [Source Code](#)

September 2026

- Led a team of 4 to build a pricing algorithm for **Kamion (YC S22)**. **2nd of 7 at UIUC Founder's Hackathon**
- Designed a *JSON schema* for a **Claude Sonnet 4.6 agent** to extract condition, brand, model and year from photos
- Built a *quantile regression* pricing model on the extracted features, reaching **87% accuracy** on **30 samples**
- Scraped **15,000** truck-listing images for *data mining*, auditing data quality via de-duplication and non-USD filtering

SKILLS

Languages & Frameworks: Java, JavaScript, HTML/CSS, SQL, React, Next.js, Node.js, Python, C++, FastAPI

Databases & Cloud: Git, GitHub, PostgreSQL, MySQL, Elasticsearch, Firebase, Supabase, AWS, Google Cloud

AI/ML: PyTorch, TensorFlow, Keras, scikit-learn, OpenCV, Grad-CAM, Hugging Face, Claude API, Gemma 4, RAG

Tools & Practices: VS Code, Agile, API Development, Claude Code, Codex, Figma, Kaggle, Google Calendar API

Concepts: Full-Stack Development, REST APIs, Unit Testing, Data Pipelines, Data Ingestion, ETL, Data Quality
